PROJECTS

"Dining with the ISS"

<https://github.com/mculep/Dining-With-The-ISS.git>

Dining with the International Space Station is my first group project. We combined two different public API's to design this amazing orbital tracker will inform the user of the exact location of the ISS and provide great places to eat near(under) it. The station moves quickly so click quickly, search, and get a move on because the station waits for no one.

"DigitalCrafts Quiz App"

<https://github.com/davidvaughan86/DigitalCraftsQuizApp>

My team and I created an App called "DigitalCrafts Quiz App" using Express and Node.JS to assist students with their knowledge in coding. We found that playing helpful study games and practice quizzes helped us understand coding even better, so we wanted to create an App where users can practice these techniques. By using DigitalCraft Quiz App, students will be prepared for future coding projects and interviews! We used Postgres SQL and Sequelize to store quiz questions and answers as well as user sessions and log in.

"Credit Sharks"

<https://github.com/davidvaughan86/Credit-Sharks-React-Solo>

I was asked to create an online shop by the CEO of "Credit Sharks LLC". This prototype showcases my abilities in React to create online retail shops. This application uses JavaScript, React, and CSS. It contains no frameworks and makes use of Flexbox. This was a solo project, and the goal is to create a fully functional online store with Stripe API. This is the prototype; the full project is labeled Capstone.

PROFESSIONAL SUMMARY

As both a passionate and goal-oriented driven Software Developer, I am seeking career path that would challenge me while incorporating my skills in leadership, logic, problem solving, and my desire to improve quality of life through application development and software design.

When I discovered programming and software engineering, I knew this would be a great fit for me to explore my creativity and engage in the creation of new programs, games, e-shops, and websites.

SKILLS

- Postgres SQL
- Sequelize
- JavaScript
- HTML5
- CSS
- React
- Express
- Python
- Database Management
- Sales expertise
- Business development and planning

EDUCATION

Certification | Software Development

02/2021

CERTIFICATIONS
WORK HISTORY

DigitalCrafts, Atlanta, GA

No Degree | Information Technology Security And Defense
American Military University, Charles Town, WV

- **Application Development, DigitalCrafts - 10/20-2/21**
