PROJECTS

"Dining with the ISS"
https://github.com/davidvaughan86/dining-with-the-ISS
https://spacestationlunchbreak.com

Dining with the International Space Station is my first group project. We combined two different public API's to design this amazing orbital tracker will inform the user of the exact location of the ISS and provide great places to eat near(under) it. The station moves quickly so click quickly, search, and get a move on because the station waits for no one.

"DigitalCrafts Quiz App"
https://github.com/davidvaughan86/DigitalCraftsQuizApp
https://digitcalcraftsquizzes.com

My team and I created an App called "DigitalCrafts Quiz App" using Express and Node.JS to assist students with their knowledge in coding. We found that playing helpful study games and practice quizzes helped us understand coding even better, so we wanted to create an App where users can practice these techniques. By using DigitalCraft Quiz App, students will be prepared for future coding projects and interviews! We used PostgresSQL and Sequelize to store quiz questions and answers as well as user sessions and log in.

"Credit Sharks"
https://github.com/davidvaughan86/CreditSharks-Capstone

I was asked to create an online shop by the CEO of "Credit Sharks LLC". This prototype showcases my abilities in React to create E-Shops. This application uses JavaScript, React, and CSS. I used Material UI and StripeJS. This was a solo project and the goal is to create a fully functional online store with Stripe API. The app features product display, email to merchant contact, and checkout.

PROFESSIONAL SUMMARY

As both a passionate and goal-oriented driven Software Developer, I am seeking career path that would challenge me while incorporating my skills in leadership, logic, problem solving, and my desire to improve quality of life through application development and software design.

When I discovered programming and software engineering, I knew this would be a great fit for me to explore my creativity and engage in the creation of new programs, games, e-shops, and websites.

SKILLS

- PostgresSQL
- Sequelize
- JavaScript
- Express
- Python
- Node.js

- HTML5
- CSS
- React
- Software Development
- Project Management
- Communication

EDUCATION

Certification | Software Development   *02/2021*
DigitalCrafts, Atlanta, GA

No Degree | Information Technology Security And Defense
American Military University, Charles Town, WV

CERTIFICATIONS

- **Full Stack Development, DigitalCrafts - 10/20-2/21**

WORK HISTORY

DEVELOPER IN RESIDENCE   *03/2021 to CURRENT*
DigitalCrafts | Atlanta, GA

- Supported student learning objectives through personalized and small group assistance.
- Created lesson materials, visuals and digital presentations to supplement lesson plans.
- Assessed student assignments to check quality and completeness before submission for grading.
- Wrote quality clean code to program complete applications in React, JavaScript, Python, HTML.

ACCOUNT MANAGER   *05/2019 to 03/2021*
AT&T | Atlanta, GA

- Exceeded sales goals and market competitions through effective negotiation of product and material pricing, freight and delivery rates and employee payment terms.
- Secured high-value accounts through consultative selling, effective customer solutions and promoting compelling business opportunities.
